The **Dynatron MARS T1** is a new universal All-in-One cpu cooler, which is compatible with almost all leading desktop processor platforms, including Intel® LGA 775/2011/1136/1150/1155/1156 and AMD® socket AM2, AM2+, AM3.

You can obtain a maximum of cooling through the combination with a silent 120mm fan, which with 38mm height can reach high air pressure at low rotational speed, and the intelligent HCC (Heatpipe Contact CPU) technology, which ensures a direct and efficient heat dissipation through 48 aluminum fins to maximize the heat dissipation surface.

This innovative fan saves energy and provides excellent heat dissipation, which allows the use of CPUs up to 160W TDP. The cooler can also be rotated 90° to be mounted in different positions.
